Madrid, September 27.

THE 22 Instant arrived here from *Lisbonne*, Signior *Durazzo*, who is to reside at this Court in Quality of the Popes Nuncio, in the place of Cardinal *Mellini*. The Count *Maximilian de Prising*, Envoy Extraordinary from the Elector of *Bavaria*, to notifie his Electoral Highnesses Marriage with the Arch-Dutchess the Emperors Daughter, had the 25th his first Audience of the King. The Conde *de Humanez* is made President of the *Hazienda* in the Place of Don *Juan de Corral*, upon whom the King has conferred the Presidentship of the Chamber of *Castille*. We have advice from the *West-Indies*, that some Ships fitted out by Order of the Viceroy of *Peru* had taken three Vessels from the Pyrates in the South-Sea.

Cracow, Sept, 26. The 10th Instant the Forces of this Crown decamped from *Oucze*, and marched to meet those of *Lithuania*, and having joyned with them, the whole Army marched towards the River *Pruth*, near which they were encamped on the 20th Instant, the Generals being resolved to advance towards *Czukaw*, to fight the Cham of *Tartary*, who they had advice was marching with a great Body of *Tartars* to put 3000 Wagons laden with Provisions and Ammunition into *Caminiec*. What was said of the Enemies having about three weeks ago plentifully supplyed that place with all things necessary for the subsistance of the Garison, is since Contradicted, and we are assured that the Convoy they then put into the place, consisted only in 300 Wagons, and that without the supply that's farther designed for them, the Turks there will be in great want this Winter. The King of *Poland* was the 18th of this month at *Pielascowitz* in his Journy towards *Russia*; He had sent Orders to several Troops, which have not yet joyned the Army, to hasten their march thither, and its said his Majesty intends to go and Command the Army in Person, and that a great many of the Nobility and other persons of Quality have put themselves in a readiness to attend him; But the weather grows so cold, beyond what it uses to be at this time of the year, accompanied with continual Rains, that its believed the Army will not be able to keep the Field longer, but will be obliged to betake themselves to their Winter-Quarters. We have advice that the Cossacks have defeated a great Party of *Tartars* near *Braclau*, and that they have taken a Vessel in the *Black Sea*, in which were two Bassa's who were going as Ambassadors with a great sum of Mony to the Crim *Tartars* to encourage them to joyn with the *Ottoman* Forces, to make head against the Army of this Crown; That the two Bassa's were killed in defending the said Vessel, but that the Mony and their Letters of Credence with all their other Papers were taken, and that the latter were sent to the King of *Poland*, The Serasquier *Soliman* according to our last advices, had not with him above 12000 Turks, and these were in a great consternation, having heard of the defeat of their Army in *Hungary*, and of the taking of *Newheusel*.

Vienna, October 4. On *Sunday* last arrived here the Electoral Prince Palatin. On *Tuesday* the young Arch-Duke was Christned by Cardinal *Bonvisi* the Popes Nuncio, being Named *Charles*, *Francis*, *Joseph*, *Wencelaus*, *Balthazor*, *John*, *Anthony*, *Ignatius*. We have had no Letters from Upper *Hungary* since the account gave you in our last that the Town of *Caschaw* had sent Deputies to General *Schultz*. The Duke of *Lorrain* continues encamped near the River *Gran* to reinforce as there may be occasion, the detachements that have been already sent to Upper *Hungary* and *Agria*. We have Letters from the Imperial Army in *Croatia* of the 28th of the last month which was then still encamped near *Turanowitz*; They tell us that the Governor of *Carelstadt* had made a great incursion into the Enemies Territories, That he had burnt several Castles and Villages, and was returned with a great deal of Booty; That the Turks had put strong Garisons into *Porthin*, *Orovitza*, *Valpo*, and *Effeck*, while the Bassa of *Bosnia* kept the field with the Forces under his Command to observe the Imperialists; but it was believed the ill weather would very quickly oblige both sides to go into their Winter-Quarters. The Baron *de Mercy* is before *Agria* and has we hear done great execution with his Bombs; In his march thither he possessed himself of *Zatmar* and put a Garison into that place. The Emperor has sent the Sieur *Mayersheim*, to the Elector of *Cologne* to make a farther Treaty with him concerning his Troops which are now in his Imperial Majesties Service.

Vienna, October 7. Last night arrived here an Express from the Imperial Camp, being sent by the Duke of *Lorrain* to give the Emperor an account that he had received advice from Upper *Hungary*, that *Tockay* and *Onotz* had surrendred upon Articles; And that he was expecting to hear that *Caschaw* had done the like. That the Baron *de Mercy* having in his march towards *Agria* found *Zatmar* abandoned by the Enemy, he had put a good Garison into that place; That upon his coming before *Agria* he was informed by some Prisoners he took, that the Garison as well as the Inhabitants were in a very great dis-

order
